## Commitment to Quality & Environment

Our values are the basis of what we do every day. They serve as the blueprint for our business. Quality and Environment are two important cores of our values.

**“We want to be your partner, and want you to come to us first”**

We abide by the following principals:

1. We are here for you, and we strive to fulfil your needs
2. We will supply parts of highest quality
3. We develop skills in our employees by training, providing adequate support, and motivation
4. We are mindful about our environment and take appropriate steps to eliminate or reduce environmental damages
5. We know change is inevitable, we are dedicated to constant improvements. We measure such improvements with data.
6. We know energy is not abundant; we strive to reduce the use of natural resources and energy, prevent hazards which cause environmental damage.
